

SIF STEENFELDT

PERSONAL INFORMATION

I have a background in Digital Design and several years of experience in service and collaboration from various roles. In the summer of 2025, I completed my bachelor's degree in Digital Design from Aarhus University and am currently taking a year off from studying, having moved back to Copenhagen after four years in Aarhus to explore new opportunities.

I am outgoing, approachable, and quick to adapt to new tasks. My experience includes working on user-centered design processes, prototyping, and digital communication, and I enjoy bridging creativity and technology to create meaningful experiences. Outside of work, I am deeply engaged in music and creative projects, and I value social connections both in and outside of professional settings.

EDUCATION

Digital Design Bachelor's degree (2022 - 2025) Aarhus University
